To Whom It May Concern:

RE: F.R. RUSH TRANSFER LTD. CHARLOTTETOWN, PEI
(North American Van Lines Ltd)

It is with pleasure that at this time, I respectfully acknowledge the moving services as provided by the North American Van Lines affiliate firm of F.R. Rush Transfer Ltd. of Charlottetown, PEI.

In the month of December of 1981, the firm of F.R. Rush Transfer Ltd. were contracted to effectively move the contents of the Queen Elizabeth Hospital Administration Headquarters; of Prince Edward Island Hospital (175 beds); Charlottetown Hospital (168 beds); Charlottetown Rehabilitation Centre (25 beds) and the Provincial Laboratories to the new Queen Elizabeth Hospital a new facility of 352 beds which was scheduled for completion and occupancy by April 1, 1982. The move as planned was to be effected by reducing patient load and services in the acute care institutions so that one hospital would be moved in its entirety with the second unit to be moved as the new operation would permit. The Rehabilitation Centre was not moved until all were assured that this service could be provided without interruption.

The move of all furnishings, equipment, diagnostic instrumentation and delicate laboratory equipment was carried out by F.R. Rush Transfer Ltd. of Charlottetown to completion without incident, total damage claims were approximately \$900 of which \$350 was expended for the repair of an old oil portrait.

The Board of Directors and Management of the Queen Elizabeth Hospital have expressed their complete satisfaction to F.R. Rush Transfer Ltd. (North American Van Lines) for their efficiency and co-operation in effecting a move that is considered to be the largest move ever carried out on Prince Edward Island.

As co-ordinator of the move, I do not hesitate to pay tribute to F.R. Rush Transfer Ltd. for a job well done and to express my pleasure to have been affiliated with such an efficient firm.

Yours very truly,

E.Y. Porter
Ass. Executive Director
Queen Elizabeth Hospital
